

Made to Fit Your Space

NEOS Chameleon is in essence a system of fully integrated, modular components. In contrast to an off-the-shelf-solution, it enables you to incorporate your individual preferences into the design process, thereby ensuring the look and functionality that you desire for your space.

NEOS Chameleon is adjustable and scalable. It is capable of accommodating all your storage needs and can be modified over time as your requirements change. A sample selection of the available accessories and modules are listed below and incorporated into the diagram to the right.
